

REASONS TO LOVE DUCTLESS

Innovative, High-Performing HVAC Solutions for Single Zone, Multi-Zone & Light Commercial Comfort

Turn to the experts

BRING COMFORT TO ANY SPACE IN ANY CONDITION

Extreme Temperature Performance

Carrier® ductless units provide reliable heating and cooling even in extreme weather, from -22° F to 122° F.

Built-In Ice & Water Protection

Protect against ice build-up and water damage with a built-in basepan heater and auto defroster.

Larger Capacity Options

The Carrier light commercial ductless line is ideal for larger spaces and small business applications.

Universal Matching

Use most indoor units across our Infinity® System, Performance™ Series or Comfort™ Series with our 38MGRB multi-zone outdoor unit.

Improved Air Quality

Connect your ducted, cassette and console indoor units to an outside air supply for increased ventilation.

Single Phase VRF

Connect up to 10 units and nine zones for large multi-zone applications.

ENJOY ULTIMATE SYSTEM FLEXIBILITY & EASE OF USE

Built-In Wi-Fi®

Remotely manage your Infinity System from anywhere with built-in Wi-Fi®.

Humidity Control

Smart sensor technology on the high wall unit detects humidity levels in the room with options for humidity control.

Intelligent Eye Sensor

A unique occupancy sensor detects activity in a room and adjusts the angle of airflow for optimum comfort.

Precise Temperature Control

The Follow Me feature senses temperature at the remote control and adjusts accordingly.

One-Way Cassette

The flush mount cassette unit easily recesses anywhere in the ceiling, maximizing your comfort and control.

Third-Party Thermostat Compatibility

With the optional 24V Interface, Carrier ductless systems work with any third-party or smart thermostat.

SAVE ON ENERGY & OPERATIONAL COSTS

High Efficiency Ratings

Reduce costs with ENERGY STAR® certified units and SEER2 and HSPF2 ratings of up to 28.5 and 18.0 consecutively.

Independent Zoning

Mix and match up to four indoor unit styles for multi-zone systems and only heat and cool spaces that are in use.

Special Programs & Rebates

Take advantage of Carrier ductless' tax credit qualifications and local utility incentives.

Cooling-Only Thermostat

Don't waste money on needless heat. Carrier's cooling-only thermostat is designed for applications where heat isn't necessary.

Flexible Modes

Select Sleep Mode for maximum comfort while sleeping, Eco Mode for extra efficiency, or Turbo Mode to quickly cool or heat a space.

FORGET THE HASSLE WITH EASY INSTALLATION & MAINTENANCE

Air Handling Unit (AHU)

The AHU leverages existing ductwork—the perfect replacement for aging or failing furnaces without a complete system overhaul.

Vertical or Horizontal Installation

The Performance ducted unit's flexible installation allows for more application options—whatever works best for your space.

One-Person Installation & Cleaning

Easy-install mounting brackets firmly support the high wall unit, while tabs prop open the cover for hassle-free cleaning and filter changes.
